- Assemble a wide variety of small to large, high-value, custom, one off, automated manufacturing equipment, processing systems, robotics, packaging systems and more.
- Read and interpret detailed blueprints and complex assembly drawings along with understand the sequence and requirements of the assembly process.
- Provide quality checks of incoming materials.
- Utilize power tools and equipment to accurately connect, align, and secure parts.
- Install electrical cables, pneumatic and hydraulic systems.
- Collaborate with project teams to ensure consistency and troubleshoot any issues that may arise.
- Break down and pack out custom machines and automation cells for shipment.
- Keep assembly area organized for efficient use and work flow and maintain shop cleanliness.
- Travel to different locations to work with various teams and engineering staff when necessary.
- Mentor junior assemblers as needed.

Experience Desired:

- Minimum of 5 years of progressively responsible Mechanical Machine Assembly experience.
- Previous assembly experience of high speed material handling systems, precision automated assembly equipment, processing equipment, high speed packaging systems and more.
- Strong mechanical aptitude with ability to understand and utilize technical information.

- Experience reading, interpreting and following technical documentation, such as highly detailed blueprints, complex assembly drawings and pneumatic/hydraulic/electrical schematics.
- Proficient working with and running a variety of hand/power tools, precision measuring instruments, and machine shop equipment.

Education: High School Diploma or equivalent.

Compensation:

- Compensation depends on experience.
- Benefit package available and opportunities for personal and professional growth.

FOUNDED IN 1953...Aladdin Engineering & Manufacturing has designed and built custom machines and systems for major players across a range of industries. In doing so, it has established itself as one of the most experienced companies for custom manufacturing equipment in the United States.
